

## Dreika K2 N with knobs and two clamps

The Dreika K2 N is used with upright reinforcement. N stands for the dimpled contact surface. The dimpled surface means that the spacer is not in full contact with the formwork and is only slightly visible on the concrete surface after concreting. The length of the Dreika is designed for a rebar spacing of up to max. 27 cm. Two steel clamps Ø1.5 mm are fitted at the factory. The Dreika can be mounted on reinforcing steel Ø 6-14 mm. The clamps ensure very quick installation. Thanks to its fastening and elongated shape, the Dreika is tilt-proof and stable.

## Dreika K2 N with knobs and two clamps
