

Clipo for Ø12-14mm

The Clipo /14 is clipped onto standing reinforcement. The plastic clip can be clipped onto reinforcing steel Ø 12-14 mm. Quick installation is guaranteed. The Clipo is the ideal spacer when, for example, the reinforcement cage is embedded in the formwork (e.g. diaphragm walls) or when the formwork is slid over the reinforcement cage (column formwork, cardboard formwork tubes or concrete pipes and shaft structures). The Clipo can also be supplied with two clamps mounted on both sides as an option. The minimum width of the Clipo is then 50 mm (wider widths are also available on request).
