Side protection 1. 80

Accessory for the GK-2000 system, alternative to the BX guardrail as fully planked safety rail from structures above and under rail and road structures, e.g. electric railwaytracks and motorways.

Compatible with all GK-2000 types
Insert for bolting
Vertical level up to 1.80 metres with possible full-surface planking, either with nailing straps and/or clamping retainers
May be supplemented with BX earthing accessories.
