Curing Compound

Concrete curing agent.
Milky liquid on a synthetic resin basis. Forms a transparent film and thus protects freshly stripped concrete from premature drying. Loose cement particles are bound. Enables the subsequent application of paints and coatings.

Consumption
Approx. 150 - 300 ml per m^2 depending on substrate structure

Article description	Title of variant	Packaging piece/ metre/ metre by the metre/ bucket/ bag/ bundle/ box/ can	Weight kg/piece
